---------------------------------------------------------------------***---------------------------------------------------------------------

**Abstract -** *AI is the simulation of human intelligence processes by machines, especially computer systems. Some of the application of AI includes expert system, speech recognition, and machine vision.*

*Every new invention or breakthrough will have both, but we as human need to take care of that and use the positive sides of the invention to create a better world. The key for humans will ensure the "rise of the robots" doesn't get out of hand. Some people also say that AI can destroy human civilization if it goes into the wrong hands.*

*I did a survey through google form to find out which is mostly used AI applications.*

***Key Words***: **AI**: Artificial Intelligence

## 1. INTRODUCTION

*Every new invention or breakthrough will have both, but we as human need to take care of that and use the positive sides of the invention to create a better world. The key for humans will ensure the "rise of the robots" doesn't get out of hand. Some people also say that AI can destroy human civilization if it goes into the wrong hands.*

## 2. OBJECTIVE

1)  To analyze the perspective of all age people towards AI Applications.
2)  To study the advantages and disadvantages of AI Applications.
3)  To find out which AI application is used most.

## 3. RESEARCH METHODOLOGY

1)  Read articles based on AI application.
2)  Visited a number of websites to find out more information about AI.
3)  Prepared Google form containing a list of questions to gather information from people of different age groups.

**QUESTIONARY AND ANALYSIS:**

Below are some response to the survey I have conducted.

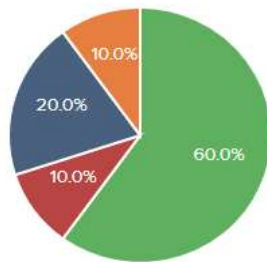

Do you use any AI Applications?

| | | |
|---|---|---|
| Yes | 10 | 100.0% |
| No | 0 | 0.0% |
| No answer | 0 | 0.0% |

As we can see, 100% population uses AI Application.

---

Question 3 — Multiple Choice
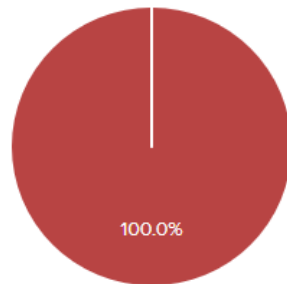

If yes, How many AI applications you used?

| | | |
|---|---|---|
| 1 | 6 | 60.0% |
| 4 | 1 | 10.0% |
| More than 5 | 2 | 20.0% |
| less than 5 | 1 | 10.0% |
| No answer | 0 | 0.0% |

60% populations use 1 AI Application

Select your gender

| | | |
|---|---|---|
| Male | 8 | 80.0% |
| Female | 2 | 20.0% |
| No answer | 0 | 0.0% |

Select your age group.

| | | |
|---|---|---|
| upto 14 | 0 | 0.0% |
| 15-30 | 10 | 100.0% |
| 31-45 | 0 | 0.0% |
| 45 above | 0 | 0.0% |
| No answer | 0 | 0.0% |

100% population are from 15-30 age group.

| Respondent | Answer |
|---|---|
| Unknown 49.35.9.XXX | AI Assistant |
| Unknown 2.51.235.XXX | What's app |
| Unknown 117.233.127.XXX | Whatsapp |
| Unknown 106.76.78.XXX | PUBG |
| Unknown 103.251.50.XXX | Snap Chat |
| Unknown 49.14.80.XXX | Jarvis: control computer using voice |
| Unknown 157.33.220.XXX | Computer vision |
| Unknown 49.35.67.XXX | Bot in our company |
| Unknown 106.77.40.XXX | Google |
| Unknown 117.200.178.XXX | WhatsApp |

As we can see multiple users use variety of AI Applications.

## 4. CONCLUSIONS

AI Applications have both pros and cons. Which are affecting lives in very different manners. AI has vital impact in various fields. There are lots of benefits AI Applications along with its advantages.

Every new invention or breakthrough will have both, but we as human need to take care of that and use the positive sides of the invention to create a better world.
After collecting information from multiple peoples, we conclude that today AI applications are used for multiple purposes.
